Beware the “Summer Slide”

**Effects of Summer Learning Loss**

1. Learning loss can be recognized as early as first grade.
2. On average, students lose two months of reading skills over the summer.
3. By fifth grade, summer learning loss can leave low-income students up to three years behind their peers.

*Summer learning loss is one of the most significant causes of the achievement gap between students from lower and higher income families. For more than 25 million public school students from low-income households in America, summer is often when they struggle to find and afford food and a safe place to be.

Here are a few ways to close the gap:

- **Prevention**
  - **Make time for learning.**
    - Set aside 15–30 mins a day for summer learning.
  - **Develop math & reading skills**
    - Purchase workbooks to work on several minutes daily.
  - **Encourage creative writing**
    - Improve language skills by keeping a daily journal.
